mohitjakhotra@gmail.com | +91 910313109 | [LinkedIn](#) |

Full Stack Developer with 2 years of experience in developing, in which 1st year as Frontend developer and then I started exploring backend hence started working on full stack scalable web applications and working with cross-functional teams. Proven ability to leverage full-stack expertise to build interactive and user-centred website designs to scale.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Python, C, C++, SQL, HTML, CSS, PHP
 - **Frameworks and Libraries:** React, Next.js, Node.js, Express, Vue, Tailwind
 - **Tools and Platforms:** Docker, Firebase
 - **Databases:** MySQL, MongoDB
 - **Testing:** Jest, React testing library
 - **Operating Systems:** Windows, Linux
-

Experience

Front-End Engineer (Fellowship)

Deeptthought EduTech, Hyderabad | [Deeptthought](#)

Jun 2022 – Jul 2023

- Pvt Developed and maintained web applications using React and Node.js.
- Worked on inhouse applications that required MVPs and research from scratch.
- Improved the UIs and UXs of many MVPs that were developed previously and successfully launched for beta testing.

Full Stack Developer

[Inverse.io](https://inverse.io), Hyderabad

Jul 2023 – Present

- Working full stack to develop User interfaces for kafka applications.
- Working with Clients to understand end user requirements to maintain and develop inhouse plugins using backstage.io.
- Created POCs to integrate service now and various platforms ticketing services and also implemented them in the applications so that clients can register their services in the platform.
- Wrote unit and integration tests to ensure code quality using jest.

Projects

- I've noticed that many small businesses, like coffee shops and cafeterias, face challenges with maintaining printed menu cards and keeping track of daily sales. To address this, I envisioned an open-source project that streamlines customer onboarding through a simple QR code. By scanning the code, customers are directed to a web app where they can view the menu, place orders, and make payments directly. This approach not only enhances the customer experience but also saves costs associated with frequently reprinting menus, which tend to wear out over time. Ultimately, this solution empowers businesses to modernise their operations while focusing more on quality service and less on manual processes.

(On - going project will attach link soon)

Education

- Bachelor in Computer Applications
Brihan Maharashtra College of Commerce
- Master In Computer Applications
Vellore Institute Of Technology (On going)

Certifications

- [Web Design Certification](#)
- [Javascript Algorithms and Data Structures Certification](#)
